Driving Logistics Excellence Through Optimized IT And Secure Access

Securing Application Access And Optimizing Bandwidth For A Leading Logistics Provider

CUSTOMER OVERVIEW

Provides nationwide parcel delivery, warehousing, and supply chain solutions.

PROBLEM STATEMENT

The client encountered challenges in securing application access and controlling data:
- Needed to restrict cloud app access to specific locations and devices.
- Required device fingerprinting during user registration.
- Wanted to control user copy/paste and screen capture functions.
- High bandwidth consumption affecting performance.

REQUIREMENT

The client needed a secure solution to control access to applications while optimizing bandwidth and maintaining control over user actions.

ACCOPS SOLUTION

- HySecure to deliver clientless web app access over L7 Tunnels with reverse proxy, using TLS 1.2 encryption.

BENEFITS REALIZED

- **Secure remote access:** Instant access to applications from anywhere over any network.

- **Enhanced security:** Restricts user actions on devices and leaves no data on endpoints.

- **Vendor access:** Allowed secure access to business apps for vendors on unmanaged devices.

- **Detailed audit logs:** User activity tracking to ensure compliance with security policies.

- **Bandwidth optimization:** Reduced network consumption, improving overall performance.

- **Device-based access:** Restricted application access to authorized devices only.
