

PHARMA - CASE STUDIES

# Empowering Pharmaceutical Innovation Through Secure IT Infrastructure

# Enabling Secure, Compliant, And Cost-Effective IT Infrastructure For A Leading Biotechnology Innovator

## CUSTOMER OVERVIEW

Specializes in the development of vaccines and biotherapeutics.

## PROBLEM STATEMENT

Faced challenges in transitioning from traditional desktop-based computing to a more secure and efficient environment:

- Sensitive nature of strategic data raised security concerns.
- Required compliance with stringent regulatory frameworks.
- High costs associated with end-user computing.

## REQUIREMENT

The client sought a seamless transition from traditional desktop-based computing to end-user computing virtualization. The rationale was to leverage a scalable solution to centralize applications, maintain compliance, reduce operational costs, and protect sensitive data.

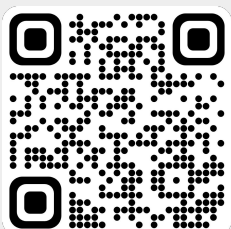

## ACCOPS SOLUTION

- HyWorks for virtualizing end-user computing.
- HyDesk for power-efficient zero client and thin client hardware.

## BENEFITS REALIZED

- **Centralized management:** All endpoints managed from a single console and a single location.
- **Improved security:** Enhanced protection for sensitive data with centralized application access.
- **Simplified IT management:** Eliminated endpoint-specific IT administration, improving efficiency.
- **Increased accessibility:** Easier access to critical applications for all users.
- **Cost-efficiency:** Reduced total cost of ownership (TCO) for the overall solution stack.
