

Accops Product Editions

This document is a quick reference to features included in different Accops products editions released in June 2025.

Accops offers the following product suites with different editions

- **Accops Digital Workspace**
- **Accops HySecure**
- **Accops HyID**
- **Accops HyLabs**
- **Accops Virtual Browser**

Features marked with (✓) are included in the edition. Blank fields indicate excluded features. “Add-on” denotes features available for purchase separately.

Important points

1. This is not an exhaustive list of features included in each edition. Please refer to the software manual for details.
2. Not all features are enforced using software control based on edition purchased. Entitlements to the features may be trust based. However, Accops may bring software controls on the features for each edition in future product releases.
3. Accops may add more features or include new editions from time to time. Please refer to www.accops.com for the latest information.

For detailed licensing policy, please refer to Accops Licensing Guide.

Accops Digital Workspace

Accops Digital Workspace (DWS) is a bundled offering focused on Virtual Desktop Infrastructure (VDI) and includes selective features of ZTNA (HySecure) and IAM (HyID) features, making VDI more secure and ubiquitous.

Key differences between the various DWS editions are.

Digital Workspace Bronze	A bundle with all required features to move from fixed desktops to virtual desktops including Shared (or session based) and personal desktop support running any Microsoft Windows operating system. Licensing is device based on working with the approach of fixed PCs replaced with thin client devices. DWS Bronze edition is only available for device licensing.
Digital Workspace Silver	A flexible bundle to implement VDI and enable work from anywhere with basic security features of ZTNA and option to Add-on to strengthen security when accessing public and untrusted network. An option to buy named or concurrent session is available.
Digital Workspace Gold	Most recommended bundle to provide an integrated workspace access interface including VDI, private app access, SaaS Apps with strong zero trust-based security. With strong focus on on-demand endpoint data leakage prevention, posture checks with contextual access, this edition provides the most features at the best cost. Additional features can be bought as an add-on.
Digital Workspace Platinum	A complete offer including all features available along with VDI, ZTNA and IAM from Accops. The edition includes unique security and authentication features.

Accops HySecure

Accops HySecure is a ZTNA gateway offering securing access to private applications.

Key differences between different HySecure editions are.

HySecure Bronze	A secure access gateway with pure agent-less access for private access to web applications, RDP, VNC and Accops VDI. Suitable for flexible, available anywhere access with zero endpoint management. Contextual access is limited to browser details and geo-location. Licensing is both concurrent and named user based.
HySecure Silver	A cost-effective flexible bundle to support work-from-anywhere users with advanced access control and secure application tunnelling. Includes foundational Zero Trust Network Access (ZTNA) features and integrates with existing identity providers. Includes basic posture check with option to add advanced posture check as add-on to offer cost effectiveness. Offers integration with SSO and includes basic MFA.
HySecure Gold	The most popular bundle offers robust Zero Trust-based secure access to corporate apps—whether hosted in datacenters or cloud. Includes contextual access, role-based access control, posture checks, and application-level micro-segmentation. Ensures optimal balance between usability and strong security. Additional modules like endpoint validation and DLP are available as add-ons.
HySecure Platinum	The most comprehensive security suite from Accops, combining full-featured ZTNA with full capability of IAM, and granular policy enforcement. Includes continuous posture evaluation, strong multi-factor authentication, risk-based access, and centralized monitoring. Includes API integration for advanced automated workflows of enterprises. Ideal for enterprises prioritizing advanced cybersecurity, compliance, and complete visibility across users and devices.

Accops HyID

Accops HyID is a comprehensive IAM solution offering user access management, MFA and SSO.

Key differences between different HyID editions are.

HyID Bronze	An essential identity and access management bundle to add MFA to a single application, addressing specific need for stronger authentication at minimal cost. The edition allows flexibility to choose any one type of MFA integration for a single application.
HyID Silver	A flexible and cost-effective identity security solution with option to add enhanced authentication options including push notification, password-less, biometrics and device binding and more features. Offers centralized user policy enforcement, integration with cloud and on-premises apps, and basic risk-based authentication capabilities. Licensing is named user based.
HyID Gold	The most recommended edition provides complete identity lifecycle management, adaptive authentication, SSO for cloud and on-prem apps. Enables organizations to enforce Zero Trust principles with context-aware access policies, identity governance, and self-service capabilities. Add-ons available for advanced compliance and audit reporting.
HyID Platinum	An all-inclusive IAM suite offering strong identity security, advanced SSO, password-less login, risk-based access controls, and deep integration with ITSM, HRMS, and third-party tools. Includes intelligent anomaly detection, automation of user provisioning/de-provisioning, and full support for regulatory compliance. Designed for enterprises seeking a highly secure and scalable identity management framework.

Feature Availability Across Editions:

Accops HyLabs

HyLabs Education Edition	Purpose: Designed specifically for schools, colleges, universities, and training institutes to digitize physical labs and enable anytime-anywhere learning. Key Highlights: • Curriculum-based lab provisioning: Pre-configured lab environments mapped to academic courses. • Multi-course scheduling: Manage multiple lab sessions for different subjects, batches, or faculty members. • Instructor-led control: Teachers can monitor, control, and assist student sessions in real-time. • Browser-based access: Students can log in from any device, anywhere—no heavy software required. • LMS Integration: Seamless connection with Learning Management Systems like Moodle, Blackboard, etc. • User Management via AD or internal DB: Easy onboarding of students through CSV, directory sync, or manual registration. • Cost-effective licensing for educational institutions: Per student, per session, or bulk institutional licenses. Best Suited For: Academic institutions needing structured, schedule-based lab delivery with multiple user types (students, teachers, admins).
HyLabs Corporate Edition	Purpose: Tailored for corporate training teams, L&D departments, certification bodies, and technical assessment platforms. Key Highlights: • On-demand lab provisioning: Spin up virtual labs instantly for assessments, workshops, or hands-on training. • Role-based access control: Assign labs to trainees, trainers, auditors, and examiners with precise permissions. • Integration with HRMS, LMS, and CRM tools: Automate user access and training workflows. • Assessment and analytics module: Track performance, completion, usage metrics, and scoring. • Support for time-bound access: Ideal for temporary access during workshops, hackathons, or certification exams. • Branding and white labelling: Customize the platform to reflect corporate branding. • Advanced compliance support: Activity logging, session recording, and policy enforcement for audits. Best Suited For: Enterprises delivering technical training, conducting internal skilling programs, or evaluating employees and partners through virtual environments.
